

Java script components

Typical Tab Nav Structure

```
<ul class="nav nav-tabs" role="tablist">
    <li role="presentation" class="active">
        <a href="#peter">Peter Pan, CEO</a></li>
    <li role="presentation">
        <a href="#danny">Danny Witherspoon, CFO</a></li>
    <li role="presentation">
        <a href="#agumbe">Agumbe Tang, CTO</a></li>
    <li role="presentation">
        <a href="#alberto">Alberto Somayya, Exec. Chef</a></li>
</ul>
```

2:07 / 7:36

the one marked as active is the one shown to the user as default

nav-justified to justify the tabs/pills to stretch to the width of the parent with each element sharing its proportion of the width

Connecting Tab Navigation and Content

```
<ul class="nav nav-tabs" role="tablist">
    <li role="presentation" class="active">
        <a href="#peter" aria-controls="home" role="tab" data-toggle="tab">Peter Pan, CEO</a></li>
    ...
</ul>
```

```
<div class="tab-content">
    <div role="tabpanel" class="tab-pane fade in active" id="peter">
        <h3>Peter Pan <small>Chief Epicurious Officer</small></h3>
        <p>...</p>
    </div>
    ...
</div>
```

Peter Pan Chief Epicurious Officer
Our CEO, Peter, credits his hardworking East Asian immigrant parents with the intention of giving their children the best food possible. After immigrating to America with his family, he started a restaurant called "The Frying Pan" which became well known. He brings his unique culinary connections.

Collapse Simple Example

```
<div class="col-md-5 col-md-offset-1">
  <div class="collapse in" id="collapseExample">
    <div class="well">
      <h3>Some Collapsible Content</h3>
      <p>This is some collapsible content that will be toggled
         with the button on the right</p>
    </div>
  </div>
</div>

<div class="col-md-3">
  <a class="btn btn-primary" role="button"
     data-toggle="collapse" href="#collapseExample"
     aria-expanded="false" aria-controls="collapseExample">
    Toggle Info
  </a>
</div>
```

Some Collapsible Content

This is some collapsible content that will be toggled with the button on the right

[Toggle Info](#)

Accordion

```
<div class="panel-group" id="accordion" role="tablist">
  <div class="panel panel-default">
    <div class="panel-heading" role="tab" id="headingPeter">
      <h3 class="panel-title">
        <a role="button" data-toggle="collapse"
           data-parent="#accordion" href="#peter">
          Peter Pan
          <small>Chief Epicurious Officer</small>
        </a>
      </h3>
      <div role="tabpanel" class="panel-collapse collapse in" id="peter">
        <div class="panel-body">
          ...
        </div>
      </div>
    </div>
  </div>
  ...
</div>
```

Peter Pan Chief Epicurious Officer

Our CEO, Peter, credits his hardworking East Asian immigrant intention of giving their children the best future. His motto, inexpensively at the supermarket, was his first inspiration. This brings his zeal for fusion cuisines to this restaurant, pion...

Dhanasekaran Witherspoon Chief Food Officer

Agumbe Tang Chief Taste Officer

Alberto Somayya Executive Chef

Only the first one has the collapse in class. In the panel body we have the text

Scrollspy is added to a nav to move with the page.. also for every heading it highlights the current chapter.

The screenshot shows a presentation slide with a blue header containing the title "Scrollspy". Below the title is a bulleted list of instructions:

- Add data-* attributes to body of the page:
`<body data-spy="scroll" data-target="#myScrollspy" data-offset="200">`
- Add a nav element to the page
`<nav class="hidden-xs col-sm-2" id="myScrollspy">
 <ul class="nav nav-pills nav-stacked" data-spy="affix" data-offset-top="400">
 Our History
 Corporate
 Facts

</nav>`

A small video player window in the bottom right corner shows a person's face, likely the speaker.

- data offset is there to not track the jumbotron (not needed)
- after the page scrolls for 400px, the nav will follow the page
- css changes from position relative to position fixed

```
.affix {  
    top:100px;  
} // makes it so that the menu stays 100px from the top when scrolling
```
